PayOne

PayOne Overview

PayOne, a leading payment gateway technology provider in the MENA region with over 20 years of expertise, is revolutionizing digital payment acceptance for businesses. We specialize in developing in-house payment solutions that alleviate the technological burden, allowing businesses to focus on their core operations. Catering to eCommerce portals, mobile apps, POS terminals, and pay-by-link services, we offer deep insights into regional needs and regulations, empowering businesses to adapt, succeed, and deliver exceptional value.

Our Products

We offer a comprehensive suite of payment solutions designed to cater to various industry needs, from seamless payment gateways to specialized integrated solutions for the hospitality and automotive sectors. Our innovative products are tailored to empower businesses, enabling efficient operations and global reach with multi-currency pricing.

Payment Gateway

Our payment gateway provides robust, secure transaction processing for businesses of all sizes. Designed for seamless integration, high reliability, and enhanced customer payment experiences, our platform also offers white-label solutions, allowing businesses to brand their payment systems in line with their visual identity. Additionally, we offer global support with our Multi-Currency Pricing (MCP) feature, enabling transactions in multiple currencies and facilitating broader international operations.

Key Benefits

Secure processing

Easy integration

Omnichannel support

24/7 technical support

Support local payment methods

Who we serve

Ideal for e-commerce retailers, service providers, and online marketplaces seeking reliable payment solutions. Our white label feature is especially useful for acquirers and large merchants looking to offer customized services without the development overhead.

PayOne for Hospitality

Elevate your guest experience with our tailored solution for the hospitality industry. Our integrated technology streamlines operations in hotels and F&B venues, ensuring seamless experience.

This bank-agnostic, country-neutral, and portable solution is Oracle-validated, ensuring it integrates seamlessly with your existing payment management system to automate payments and enhance efficiency.

Key Features
